Customer Reviews

This almanac has some great information about the presidents and various other facts about the world. I took off 2 stars mostly because I'm comparing this almanac with two others: The Old Farmer's Almanac for Kids 2014 which I give a solid 5 stars to, and the National Geographic Kids Almanac 2014 which I'll probably give 4 stars to (although it is almost as good as the Old Farmer's Almanac for Kids). The World Almanac for Kids has too many pop culture references. If you want your kid to know some information about bestselling music artists, that they share a birthday with some obscure celebrity instead of somebody like Benjamin Franklin, or some info about Justin Bieber, then this is the almanac for your kids. Maybe it would be good for education in those topics if your child is going to be in a trivia contest or on Jeopardy, other than that, I think that information is pointless and serves no real educational purpose. I can't give it less than 3 stars, though, because it does keep kids occupied with something to read and has some fun and useful information. I just think it could be better and less pop culture focused.

My grandson had the 2013 almanac and read it cover to cover. He is now enjoying this one. He's eleven and I keep it in the car for him. That's what he grabs as soon as we get in the car. It's refreshing to see him actually reading instead of playing an electronic game.

My son (7) and I reviewed this book for Mother Daughter Book Reviews and here are our thoughts: SON SAYS: This book is about all kinds of facts like which animals are endangered, what's the most popular kind of dog, information about different countries, life on Earth, and lots of other things. I haven't read the whole book, but I like to flip through and read a couple of pages at a time. I thought the book was really awesome because I like the pictures and where they were, because it's really easy to see them and they make it live action using real photos and using real colour. And there's A LOT of pictures. I learned that some endangered animals are chimpanzees, the rhinoceros, leatherback sea turtles, and the Amur leopard. There are thousands of Earthquakes each year. We live in an earthquake region on the West Coast. I learned that there are such things as flying frogs and they have just been discovered in Chi Minh City in Vietnam. I really, really loved the book and I want to read a little bit every day because I've learned so many new things. I loved the pictures of the koalas. I want to give it 7 million stars but my Mom won't let me (again), so I'll just give it 5 stars. I think everybody would like this book. Everybody in our family including my tante Michele liked this book. MOM SAYS: The World Almanac for Kids is a well-designed, visually beautiful, kid-friendly mini-encyclopedia bursting with fun facts for kids. This book is guaranteed to entertain children for hours and they WILL keep going back to it

(unless they have to fight their Mom for it!) I highly recommend this fabulous book for independent readers aged 7 years and older.* This book was provided to us by the author free-of-charge in exchange for our honest review. *

Bought for a tween. Likes to have it around for quick reads in car, waiting times. He's getting good working the facts into dinner conversation and even quoting in his school writing pieces. Good for the kid that likes facts & figures.

I purchased a 2014 World Almanac for each of my two grandchildren (ages 14 & 10) for Christmas & they were a big hit! I've purchased these almanacs for them for several years & they always look forward to getting them. They love to read it all through the year & always ask for it as a special Christmas gift. I definitely would recommend these for teens, as well as pre-teens.

Great to have something to pry the dreaded "DS" thumb work-out thing from a child's hands - and this does it. He also enjoys the Framers' Almanac for kids.

for my teen son who enjoys non-fiction books. He and I spend time together looking through the books and learning odd and interesting facts.

He keeps it under his bed and says he reads it every night. We're not sure we believe him, but at least it caught his interest
