# Twisters And Other Terrible Storms: A Nonfiction Companion To Magic Tree House #23: Twister On Tuesday

## Synopsis

Magic Tree House Research Guides are now Magic Tree House Fact Trackers! Track the facts with Jack and Annie! When Jack and Annie got back from their adventure in Magic Tree House #23: Twister on Tuesday, they had lots of questions. How do tornadoes form? What kinds of tools can help predict bad storms? Where did the biggest snowfall on record happen? How fast are hurricane winds? Find out the answers to these questions and more as Jack and Annie track the facts. Filled with up-to-date information, photos, illustrations, and fun tidbits from Jack and Annie, the Magic Tree House Fact Trackers are the perfect way for kids to find out more about the topics they discovered in their favorite Magic Tree House adventures.

Age Range: 7 - 10 years

Grade Level: 2 - 5

## Customer Reviews

The book that I'm reviewing in school is Twisters and it's by Mary Pope Osborne. I think this book deserves four stars because it is an interesting book to read. The book I'm reading is about weather. They talk about twisters, hurricanes, storms and other cool things. One thing that I learned is hail can be the size of a golf ball. Also, there are different kinds of hail sizes, like the size of a ant. I would recommend this book to a friend because if you're doing research you could find great information. Other books by this author are research guides on other topics. Emerson, NJ Fifth

Grader

My 7 year old son loves the Magic Treehouse books and these fact-trackers have been a big hit as a follow up. The reading level is a bit advanced over the companion stories. He can read them both with ease, but comprehension on these is a little harder as they get into scientific terms and non-fiction reading is just a little less familiar for him. I think these are books he will read and re-read (vs. the stories that he might not go back to). The Twisters Fact Tracker in particular was very interesting for him and our son loved sharing facts with the rest of the family for days!

Twisters are tornadoes. I learned about them in the book Twisters by Will Osborne. Twisters wreak everything. Twisters can destroy homes because the winds go 300 miles per hour. They hit in the midwestern U.S. in April, May and June. I feel excited about this book because it's good to know about natural disasters so if it happens you'll be prepared.

Do you know how rain is formed? Do you know when tornado season is? If you want to know these questions read the Magic Tree House book Twisters by Mary Pope Osborn and Sal Murdocca. Read this nonfiction book and learn how hail is formed, learn what is the worst storm. Also there are some sweet experiments. This is an awesome book I loved it a lot. Go to the book store near you and get this book or any Magic Tree House book.

My grandson loves his Magic Tree House collection and these books give more indepth facts about the subject. It is like reading the book all over again! And, in fact, it prompted him to reread the book.

We checked this book out at the library and my five year old kept wanting me to read it to him so much that I decided to buy it for him. We also ended up buying the companion book as well. Great for any child who loves science and learning about tornados.

I have a three and five year old girls and this is the best series going. It is appropriate for the Kindergardener and we have read every single book. Each book in the series is give or take 100 pages but it is a quick and easy read. In reading the books your kids not only get a great story but also pick up on a little history which can lead to some great discussions. I actually read the books with my ipad close by so I can google pictures of the things/places that Jack and Annie (the brother

and sister in the books) visit or see. I would recommend these books for every parent/child. When I am done I will be donating the entire set to the local library. Regarding pricing, if your intent is to read the entire series look for don't buy the four book package or single books. There are set of 1-28 and I think there is a set that is everything published 1-48. As with most things, if you buy the whole set you save significant money!

What a delightful experience you get with the Magic Tree House Books. Go on a magic adventure with your kids and there imaginations. Hands down winning by an easy victory for our Family!!!!!!
