## Customer Reviews

My almost 3 year old grandson loves tractors so he loves the John Deere books. I sent this one over to his great-grandmothers house and while he has known his numbers for more than six months, she said he spent at least 15 minutes the other day "reading" the book over and over. That's a long time for a very active toddler to spend sitting quietly with just one book. I've been using the John Deere books to help with potty training. He's a real little man as he likes to have books when he's on the potty and he'll continue to sit on his potty long after he's finished his business if it's a John Deere book.

This book was new. My Grandson loved it. He is wild about tractors and it was a great gift. The gift came when on time.

My one year old grandson loved this book! Good quality!! Very educational for a young child!!!! Nice book for the price!

My 2yo son is into all things tractor. This book was cute, but he's over it already. There are a few tactile pages, a flip page or 2, a pop-up horse, but it just doesn't hold his interest for long. I would say that a younger child (16-20 mo) would like it better, but then again it's a counting book, which implies that it's geared toward older toddlers. Maybe it just didn't work for my kid....

Very durable and cute for a baby, toddler and young child. I bought a few more John Deere books along with this and I am very satisfied.

Any body else notice that there is only four galloping horses instead of five? My son who is four pointed it out to me! He loves this book, even short a horse!

Also gave as a one year old birthday gift to my nephew. He immediately pointed to the cow and made a "moo" sound."

Since we live on a farm and love John Deere this is a perfect baby gift. These books are very durable.
