Customer Reviews

This book was one of my very favorites as a child. I would sit for hours and look at it, and when I learned to read, I would read it for hours. It was eventually sold at a yard sale and for years I'd forgotten about it. A few weeks ago I had a dream about it and had to get it again, so I ordered it. It's just as I remember it, except of course for the changed book cover...I had it in the 80's and covers tend to change from decade to decade. Anyway, I'm so glad I got to rediscover this treasured book! And it's in excellent condition!

Please bring this book back into print! I had it when I was a little girl, loved it so much, and have

even bought a copy for my child. It's educational and you can spend hours looking at the jungle scenes searching for the animals.

Loved This book as a kid! Me and my brother both. We actually completely wore it through, and my mom had to get a 2nd one. Its very realistic, has great variety, and show different locations and environments from all over the world. Its also very good for eye training and observation: better even than the "find waldo" or other such of the topic. It also teaches a wide variety of plant, insect and animal species: more than most kids books. Its not overly simplified. Parents and kids both can work at it to find the hidden things. But its not so hard that its frustrating, only a competitive challenge

Find the animals and insects in this book. The drawings are drawn for real life and with out the oversimplification for children.
